

Omar Bchir

Full Stack Developer

.NET/Angular Developer passionate about innovative technologies, I am eager to join a dynamic company where I can leverage and deepen my skills in programming and project management. My goal is to actively contribute to the creation of efficient and scalable software solutions.

Work experience

Project Graduation

From February 2021 to September 2021 [Saphir Consult](#) Tunis
Development of a web application for quality control management (SPC).

Technologies: .Net, Angular, SQL Server

Full Stack Developer

From November 2021 to September 2023 [Saphir Consult](#) Tunis

• Key Responsibilities:

- Analyzed customer specifications to identify project requirements.
- Drafted detailed technical specifications.
- Developed Web APIs using .NET Core 3.1 and migrated to .NET 6.
- Created responsive front-end interfaces using Angular Material.
- Generated PDF/Excel reports and overviews for stakeholders.
- Corrected anomalies to ensure system stability and reliability.

Key Projects:

Statistical Process Control (SPC)

A system for monitoring and improving production quality:

- **Capability Study:** Verified activity set compliance with customer requirements using mathematical calculations and diagrams (e.g., Gaussian and Henry's law).
- **Control Charts:** Recorded samples and displayed control charts, including individual value control charts.
- **Batch Control:** Detected unusual events through batch control and sample analysis.

Project Management

A comprehensive tool for managing projects and their progress:

- Role and status management.
- Configuration of project types and properties.
- Phase and task management.
- Monitored project progress using Gantt charts.

Checklist

A flexible system for checklist management:

- Managed themes, criteria, and configuration fields.
- Configured compliance levels for checklists.
- Attached themes and criteria to checklists and recorded checklist sheets based on them.

Customer Complaint Management

A solution for handling customer complaints:

- Managed complaints from receipt to resolution.
- Coordinated and monitored complaint processes.
- Tracked and resolved complaints effectively.

Technologies:

- **Backend:** .NET Core 3.1, .NET 6, .NET 7
- **Frontend:** Angular 14, Angular Material
- **Database:** SQL Server

Work experience

Full Stack Developer

Since October 2023 [Devixi](#) Sousse

- **Key Responsibilities:**

- Analyzed customer specifications to understand project requirements.
- Drafted technical specifications to outline solutions.
- Developed PDF/Excel overviews and reports for stakeholders.
- Corrected system anomalies to ensure smooth operations.

Key Projects:

Yobo

A comprehensive management solution for business accounts.

- Managed business accounts, including clients, suppliers, orders, invoices, disbursements, and HR expenses.
- Oversaw resources and their absences.
- Designed and implemented forecast graphs for each business account, covering calculations and visualizations.

Data Loading and Aggregation

Projects focusing on data collection and storage:

- Intercepted and aggregated data from external APIs.
- Stored data securely in the internal database.

IXITemplate

A foundational template for IXIN projects.

- Created a reusable base template to streamline development for IXIN projects.
- Managed administrator and user functionalities.

IXIMap

An interactive map solution:

- Developed a map to display production points.
- Implemented filtering capabilities for enhanced usability.

Technologies:

- **Backend:** .NET 7
- **Frontend:** Angular 17
- **Database:** PostgreSQL

Full Stack Developer - Freelance

From December 2023 to March 2025 [Katara](#) Qatar

- **Key Responsibilities:**

- Analyzed client specifications to identify project requirements.
- Drafted technical specifications to define system architecture and features.
- Developed Web APIs using .NET Core / .NET 7.
- Built the Front-End with Angular 14 and Angular Material.
- Implemented dynamic PDF/Excel reports for stakeholders.
- Corrected system anomalies and optimized performance.

Key Projects:

Kahraman

A bidding platform focused on product management and user interaction.

- Managed administrators and user profiles.
- Designed and implemented full product catalog management.
- Developed detailed product display and bidding functionality for end users.

Booking

An online seat and ticket reservation system.

- Developed an interactive seating map to display available seats.
- Built online ticket reservation and management workflows.
- Integrated payment and confirmation systems.
- Managed users and booking history.

Technologies:

- **Backend:** .NET 7
- **Frontend:** Angular 14, Angular Material
- **Database:** SQL Server
